The MAILING DATE of this communication appe	ars on the cover she t with the	orrespond nc address			
THE REPLY FILED 13 December 2004 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.					
PERIOD FOR REPLY [check either a) or b)]					
 a)					
have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
1. A Notice of Appeal was filed on Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.					
2. The proposed amendment(s) will not be entered because:					
(a) ☑ they raise new issues that would require further consideration and/or search (see NOTE below);					
(b) ☐ they raise the issue of new matter (see Note below);					
(c) they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or					
(d) they present additional claims without cancel	ling a corresponding number of	finally rejected claims.			
NOTE: <u>See Continuation Sheet</u> .					
3. Applicant's reply has overcome the following rejection(s):					
4. Newly proposed or amended claim(s) would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).					
5. The a) affidavit, b) exhibit, or c) request for reconsideration has been considered but does NOT place the application in condition for allowance because:					
6. The affidavit or exhibit will NOT be considered because it is not directed SOLELY to issues which were newly raised by the Examiner in the final rejection.					
 7. ☑ For purposes of Appeal, the proposed amendment(s) a) ☑ will not be entered or b) ☐ will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended. 					
The status of the claim(s) is (or will be) as follows:					
Claim(s) allowed:					
Claim(s) objected to:					
Claim(s) rejected: <u>1-19</u> .					
Claim(s) withdrawn from consideration:					
8. The drawing correction filed on is a) approved or b) disapproved by the Examiner.					
9. Note the attached Information Disclosure Statement(s)(PTO-1449) Paper No(s)					
10. Other:					

Continuation of 2. NOTE: Amended claims 1 and 8 raise new issues. The Final Office action (08/12/2004) was proper because of the amendment of the independent claims in Amendment 04/05/2004. As a result, the Shorten d Statutory period set in the Final Offic Action (08/12/2004) continues to run. In ref rence to claims 9, 10, 11, and 16 are rejected as in the offic action of 08/12/2004. As disclosed in the office action of 08/12/2004 Lepp k teaches a database that is initializ d with encryption operators (column 4 line 33-50). The encryption operators that are loaded into the database include PGP as an example. The combination of Schneier and Leppek are analogous art b cause Schneier teaches th instanc s when the encryption operators of Leppek have a finite field as claimed in claims 9, 10, 11, and 16, and therefore, enhances that teaching of Lepp k. The random key provided to the system of Leppek would provide the access address codes for the above mentioned encryption operators. The input device would as a result select a condition that includes expression data that are of the finite field and therefore the final expression generated by the system would belong to the finite field.
